IN THE KNOW
MedEd Newsletter

We are committed to the life long learning of all our staff here at UHCW including Resident doctors and other multi-professional staff.

www.mededcoventry.org

GREETINGS TO ALL !

After a fabulously hot and sunny summer, this is now our autumn edition of our newsletter. We would like to start by thanking you all for your commitment, dedication and unwavering support of patient care.

In this edition, we will be showcasing recent activities ,informing you of upcoming events alongside departmental updates.

As a Trust and Directorate, we continue to expand the number of opportunities available to you for your professional development and continuous learning. Our aim is to ensure that every doctor feels supported in their career progression, clinical learning, health and wellbeing during their training with us.

Happy reading!

Prof. Sailesh Sankar
Associate Medical Director for Education, Training and Professional Development

Dr. Marie Midgley
Head of Medical Education

A JOINT MESSAGE FROM OUR OUTGOING CHIEF REGISTRARS

As our year as Chief Registrars comes to an end, we are incredibly proud of what has been achieved and grateful for the opportunity to represent and support resident doctors across UHCW.
Over the past year, we have had the privilege of working with colleagues across the Trust on a wide range of initiatives. Together, we have helped strengthen resident doctor engagement and representation, improve induction and support for new starters, develop the 10PP programme, support recruitment and education initiatives, contribute to workforce and rota improvements, and work with teams to make better use of professional development time. We have also been pleased to contribute to broader work focused on education, wellbeing, working conditions, and digital innovation.

We are hugely grateful to everyone who had engaged with the Chief Registrar role and helped turn ideas and feedback into practical improvements.

Alongside these achievements, there have also been important challenges. In particular, the experiences of Locally Employed Doctors (LEDs), including contractual issues and the implications of the Medical Training (Prioritisation) Bill, have reinforced the importance of ensuring that every doctor feels represented, valued, and supported. These experiences have strengthened our commitment to advocating for all resident doctors and ensuring their voices continue to be heard.

We were fortunate to receive tremendous support during our time as Chief Registrars, and we hope the same encouragement, collaboration, and willingness to get involved will be extended to those taking these roles forward. We are delighted to welcome **Dr. Ashley Gogna** and **Dr. Zafar Shah** as our new Chief SpRs, alongside **Dr. Kellen Mashrani** as our new Resident Doctor Peer Lead and **Dr. Qiqi Chen** as our new Mess President. We wish them every success and look forward to seeing the impact they will make over the coming year.

Although our tenure as Chief Registrars is ending, our commitment and advocacy in supporting resident doctors will continue. We remain passionate about supporting our colleagues, championing positive change, and contributing wherever we can to improve working lives.

Thank you to everyone who has supported, challenged, and worked alongside us throughout this journey. It has been a privilege to serve in these roles, and we look forward to seeing the continued progress that lies ahead.

Dr. Robert Potter and Dr. Dominic Oduro-Donkor
Outgoing Chief Registrars

MEET OUR NEW CHIEF REGISTRARS

Hi I'm Zafar Shah

"I am delighted to begin my role as **Chief Registrar** and to have the opportunity to advocate for and support our resident doctor community at UHCW. Besides my Chief Registrar role, I am a Higher Specialty Trainee in GIM, and I look forward to continuing the excellent work established by our outgoing Chief Registrars, Dr. Dominic Oduro-Donkor and Dr. Robert Potter, while building on their achievements.

I am excited to collaborate and work alongside my fellow Chief Registrar ~ Dr. Ashley Gogna; our new RDPL ~ Dr. Kellan Mashrani; our new Mess President~ Dr. Qiqi Chen; and colleagues from across the Trust. Together, I believe we can create a positive working environment in which resident doctors feel valued, supported, and feel proud. I am keen to work on areas across the trust where, I can make positive impact and continuous improvements.

I would be pleased to connect with you and hear your ideas, concerns, and recommendations. Our aim is to ensure that the voice of every resident doctor is heard and appreciated across the Trust, while working collaboratively to deliver meaningful and lasting change.

Hi I'm Ashley Gogna

"I am excited to take on the role of **Chief Registrar** this year, working to understand and represent the views of resident doctors across the Trust. Having just completed Internal Medicine Training, I've now been working in the Trust for over three years and have come to appreciate many of the issues resident doctors face day to day. I hope to work closely with resident doctors to help highlight these issues and collaborate with the Trust on practical, workable solutions.

Alongside my Chief Registrar time, I also work clinically in Acute Medicine, where I'm keen to help drive improvements that could have positive implications for resident doctors across other specialties too. Whatever I'm doing, I try to keep up with teaching, resident doctor engagement, and wellbeing at the heart of it.

I aim to build on the excellent work of the previous Chief Registrars, Rob and Dom, and I'm looking forward to working alongside the new team — my fellow Chief Registrar Zafar, our RDPL Kellan, our Mess President Qiqi, and the wider resident doctor workforce. I think we have a brilliant team, and I'm keen to see what we can achieve together — helping make UHCW a place people are proud to work, enjoy coming into and want to keep improving.

MEET OUR NEW RDPL AND MESS PRESIDENT

Hi I'm Kellan Mashrani

"I'm delighted to be representing resident doctors as the **Resident Doctor Peer Lead** this year. For those I haven't had the chance to meet yet, I'm an ST1 EM trainee who has worked at UHCW for the past four years, including the last two as an ITU Fellow.

The Resident Doctor Peer Lead is a relatively new role, with a particular focus on supporting the Trust's implementation of the NHS England 10-Point Plan to improve resident doctors' working lives. I'll be building on the excellent work of the outgoing Chief Registrars and working with colleagues across the Trust to help ensure we meet the nationally set standards and, wherever possible, go beyond them.

UHCW is a brilliant place for resident doctors to work, and I want to help make sure our working environment continues to improve. I'm always approachable and very happy to listen, so please keep me in the loop with any ideas, concerns or potential solutions relating to the 10-Point Plan or wider issues affecting resident doctors. I'll always do my best to support, signpost or help take things forward where I can."

Exciting opportunities are now open within our Doctors Mess Committee.
The 1st Cycle of Application is now open until 03/10/2026 ~ 8pm.
(Please see poster on Announcement page for more information)

Hi I'm Qiqi (Chi Chi) Chen

"Hi everyone! I'm your **UHCW Resident Doctors' Mess President** for this year — and, as a GPST2 currently on my final hospital placement, I'm making the most of my last stint in hospital life! I've previously been involved with a Doctors' Mess at another Trust, and current active GPRF member so I've got a bit of a "method to my madness" when it comes to Mess life! 😄

My vision this year is to continue the fantastic work Rob has done and build an even more lively, friendly and helpful Resident Doctors' Mess community across UHCW, including St Cross Hospital. Alongside our Mess Committee, I'll be working on representing resident doctors and LEDs, improving our Mess spaces and amenities, supporting wellbeing, organising social events, and creating opportunities to connect with colleagues — whether you're just starting out, somewhere in the middle of training, working as an LED, or taking a less traditional route through your career.

The UHCW Resident Doctors' Mess is here to support, connect and bring together doctors across the Trust. We'll be running regular events throughout the year — from welcome events and pay-day pizza lunches to sports, socials and our annual balls — as well as keeping our WhatsApp group active with resources, advice, updates and opportunities.
Everyone is welcome. Come along, get involved and make the Mess your own! 💚

FACTS & FIGURES

RESIDENT DOCTORS IN TRAINING

Our current medical workforce includes Resident Doctors in Training ranging from the Foundation year to higher Specialty doctors. They are a crucial part of the medical workforce, and play a pivotal role in delivering quality patient care. Their training and experience contributes significantly to the long-term sustainability of the healthcare system.

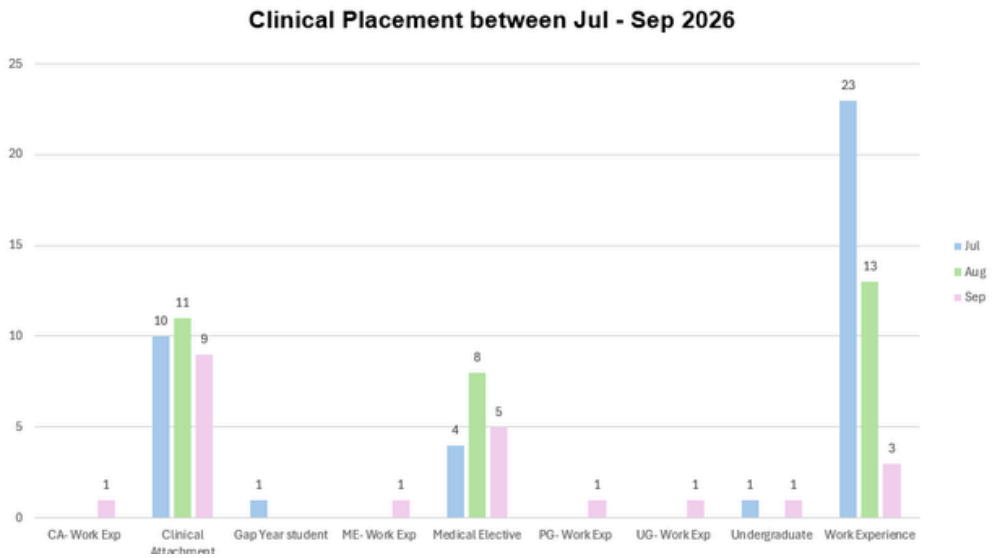

599

UNDERGRADUATE STUDENTS

We had 81 Phase 3 Warwick Medical School students undertaking their Bedside Teaching, clinic observerships and various workshops across the Trust and the students rotate to different specialties throughout their Blocks.

Clinical Work Experience, Electives & Attachments: Jul- Sep

We had almost 100 people undertaking different forms of observerships at UHCW between July and September , the majority of these being work experience students. They were very grateful to have the opportunity to shadow our supervising consultants, doctors and clinical staff. Thank you to everyone who supports this valuable work.

We also had 30 IMGs and 17 medical students observe at our Trust during this period.

Medical Education

August Rotation

We welcomed our second cohort of doctors for the year to the Trust in August. The group included Speciality and Core Doctors. Medical Education, Medical Workforce, People Support Team and Faculty members ensured that they were well supported throughout their induction and had smooth onboarding process.

6th Integrated Care Cup (ICC) charity match

6th Integrated Care Cup (ICC) charity match was organised on June 21st 2026 by Dr Narasimha Murthy, Dr Munib Mizra and Mr Devraj Srinivasamurthy and GP colleagues led by Dr Mohit Patpatia, bringing together Consultant Connect cricket UHCW team and GP Warriors C & W to raise funds for a good cause. The well attended event featured teams from UHCW and community clinical groups along with their families, and culminated in a win for GP Warriors UHCW by 22runs. GP TEAM posted 184 in 20 overs, while Consultant Connect made on 162 in their 20 overs.

The match was supported by Chief Medical Officer, Mr Jonathan Young. During Prize distribution ceremony Mr Young highlighted the value of cricket as a unifying force and the importance coming together as community for the right cause especially on the Fathers day. Dr Asad Ali, DCMO who participated also spoke about the comrderership and team spirit.

Medical Education

Bridging the Gap: Promoting Inclusive Medical Education 15 September 2026

On 15 September 2026, we had the privilege to host "**Bridging the Gap: Promoting Inclusive Medical Education"** event at University Hospital Coventry & Warwickshire, organised by NHSE Midlands. We welcomed medical educators, resident doctors, training leaders and national experts from across the Midlands and beyond to be a part of this event.

The key highlights of the event were;

- Sharing good practice across the region in promoting inclusive education
- Setting up, running and evaluating interventions
- Understanding the policy, organisational and regulatory environment
- Addressing a diverse range of experiences and characteristics

The event explored practical and evidence-based approaches to reducing differential attainment, supporting international medical graduates (IMGs), fostering inclusive learning environments, and improving equity in medical education.

The programme featured keynote addresses from **Professor Mumtaz Patel, President of the Royal College of Physicians, Professor Mala Rao CBE, Director of the Ethnicity and Health Unit at Imperial College London, and Tista Chakravarty-Gannon from the GMC.**

The event provided a valuable opportunity to share learning, honour good practice, and strengthen collective efforts to create a more inclusive, supportive and equitable educational experience for all doctors in training.

Medical Education

Lockers

We are delighted to see that the new lockers have arrived at A & E , Neonatal, ENT , Gastroenterology & Cardiology specialties. We are in the process of getting more lockers across all the other specialities in due course.

We saw that our resident doctors were pleased to have them, and we hope they are able to utilise them effectively.

Simulation

UPDATES

ASPiH (Association of Simulated Practice in Healthcare) Journey Continues...

We're delighted that the UHCW Simulation Centre has secured ASPiH Institutional Membership, providing our faculty with access to nationally recognised simulation standards, professional development resources and a wealth of educational materials. This is another exciting milestone as we continue our journey towards ASPiH Institutional Accreditation and further strengthen the quality of simulation-based education across UHCW.

Patient Voice in Simulation

UHCW Simulation Centre

The Simulation Centre is strengthening collaboration with the Trust's Patient Insight Team to ensure patient perspectives are embedded throughout simulation-based education.

This work will support the co-design of scenarios, improve learner understanding of patient experience and contribute towards ASPiH accreditation standards.

Clinical Skills

UPDATES

- We welcomed the new cohort of students to the Clinical skills department this month. They already seem to have settled in well and appear engaged and enthusiastic in our teaching sessions.
- New interactive screens are now up and running in the department which will enable for more exciting and engaging teaching sessions for our delegates.
- We have recruited a new administration and course coordinator to join our team, who will be starting very soon.
- This year to aid revision and to help to be more sustainable, we provided 'goody bags' for our students. They included a catheter pack, wound care pack, 2 catheters and 2 cannulas per student. The students were encouraged to then reuse as much as possible along with the non-reusable equipment being provided. This had a real impact on the use of consumables, significantly reducing overuse of equipment and aiding sustainability.

Goody bags for Students

Clinical Skills

We've got excellent feedback about the services we offer..

"TDOC sessions were particularly useful and taught very well."

"The clinical skills team at UH are good."

"I liked the clinical skills teaching as the learning sessions were well structured and engaging."

"The Clinical Skills team at UHCW were outstanding as always, with teaching, support, organisation and communication."

"The scheduled teaching sessions were very good - in particular the clinical skills team are fantastic and super eager to teach so massive thank you to them."

The clinical skills team gave me additional time to practice these skills and I was able to get additional 1-1 support for skills I was less confident with.

"The clinical skills teaching and team at the hospital are brilliant! They are very knowledgeable."

Resuscitation

UPDATES

- Over a busy summer period where the Trust welcomed its new FY1 doctors, the resuscitation team helped to deliver their Advanced Life Support training. Now, nearly all our FY1 doctors are ALS providers.
- Head of Resuscitation, Vanessa Threadgold, was nominated for an OSCA in the category UHCWI improvement award due to her contribution and commitment to the role out of ReSPECT on EPR.
- Vanessa has also recently been appointed as regional representative for the RCUK for advanced life support. A role that recognises exemplary standards and integrity, utilising experience as a subject matter expertise. This also recognises the highly regarded reputation that Vanessa and the UHCW Resuscitation service have, being proud to represent all of the Trust values at a high level nationally.

TRAINING DEVELOPMENTS

- The Resuscitation Service now have 2027 dates in place for Resuscitation courses. Please do contact us for our prospectus.
- Over the coming months, the Resuscitation Service aims to introduce new UK Resuscitation Council Courses to its catalogue: Out of Hospital Advanced Life Support/ out of hospital Newborn life support, and Newborn Life Support Recertification Course.

RESPECT UPDATES:

- May 2026 saw the introduction of digitised ReSPECT plans on EPR. Since go live, we have seen consistent and improved quality in compliance and process, resulting in better patient care. We welcome an imminent external audit of ReSPECT and look forward to these high standards continuing.
- Since go live there have been potential improvements identified and these will be introduced as part of phase 2.
- The Resuscitation service review all plans daily and some early themes and areas for process improvement have been identified.
- Please ensure all paper plans are scribed through to say transcribed digitally and given to the ward clerks for scanning and filing, these should not be filed in patient paper bedside/ward based notes.
- It is essential that the signature is generated to complete the plan, please also ensure that your name, job role and GMC/PIN/HPC registration number is included. This is vital for the plan to be valid on printing. These will become mandated fields in phase 2 , so we ask for your assistance until then.

Knowledge & Library Services

LIBRARY GUIDE FOR DOCTORS!

The UHCW Knowledge and Library Services (UHCW KLS) team are pleased to offer a very warm welcome to our intake of newly qualified and resident doctors – we hope you enjoy your time at UHCW!

We've produced a guide to the services and resources available to you while you are with us. There's print copies outside the library (1st floor, CSB) but if you prefer, you can read it online too:

uhcwlibrary.org/guide-for-doctors

KLS READING CHALLENGE

Our Reading Challenge is well underway - in fact we've given out our first Platinum digital award to a member of staff who has already read 22 books!

However, you just need to read 5 books before the 31st December 2026 to take part. Record them in your passport, or enter them online, and be in with a chance of winning a prize after the competition closes.

Whether you are a lifelong reader, or haven't picked up a book in a while, this is a great opportunity to find some inspiration and support your wellbeing through reading, one page at a time. **Whatever you're into, read into it.**

uhcwlibrary.org/reading-challenge-2026

KLS TEAM AT ICML 2026

In July, members of your library team travelled to Glasgow to present and participate at the 14th International Congress on Medical Librarianship (ICML).

Team members Bridget O'Connell and Beth Jackson both delivered presentations, and Andy Doyle, Holly Austin-Davies and Keri Bramford-Hale all volunteered their time to chair sessions at the event. However, a huge thank you must go to our Head of Knowledge Services, Imrana Ghumra, who was the Conference Lead for the Congress.

Our Assistant Librarian Francesca Emter has written a blog to share her reflections on the sessions she attended at #ICML2026. Read on for more information about her experience...

uhcwlibrary.org/uhcw-kls-icml2026

Congratulations are also in order for Beth Jackson, who's poster on her Summer School for UHCW staff won 1st Prize at the ICML Poster Presentation competition. You can view her poster and read her project write-up here: **tr.ee/vUNARt**

GET READY FOR BLACK HISTORY MONTH

October is Black History Month, and the KLS team are calling on our colleagues of Caribbean or African heritage to get ready to help us celebrate the occasion, honouring the contribution of Black colleagues to the NHS.

Keep your eyes peeled for further details of both online and in-person events coming up in October, including a Library Open Day and community garden. We're also keen to shared our heritage through the medium of food! If you have a fantastic recipe to share with us, please get in touch via library@uhcw.nhs.uk over the next few weeks so we can showcase them during our Open Day, as part of our ongoing Big Tasty Read campaign and book collection.

You'll find further information about the upcoming events via posters and displays outside the library, as well as via our social media. If you aren't already following us, why not?! Find us online below:

Meet our NEW Team Members

The Medical Education Team welcomed our two new members, **Thomas Stenson** who joined us as Medical Education ICT and AV Technician. and **Emma Payne,** who joined us as the Medical Education Course administrator. They are excited to be part of the Medical Education team.

We welcomed **Michelle Mahony** to the new role of Lead Clinical Skills Practitioner. She will be leading the undergraduate & postgraduate clinical skills teaching for students from Warwick Medical School to internal & external clinical staff. Her main objective is to develop the post graduate service to be a centre of excellence for all the teaching & assessing of clinical skills.

We welcomed **Mr. Pradyumna Naredla,** Consultant OMFS Surgeon as the new Educational Lead for Oral & Maxillofacial specialty.
~ Thank you for your excellence **Mr. Niall Mcleod,** Consultant Oral & Maxillofacial Surgeon, Clinical Service Lead for Oral & Maxillofacial Surgery, Group Clinical Director for Surgery and Former Educational Lead.

We welcomed **Mr. Asif Mahmood**, Consultant Vascular Surgeon as the new Educational Lead for Vascular Surgery specialty.
~ Thank you for your excellence **Mr. Ashraf Elsharkawy**, Consultant Vascular Surgeon and Former Educational Lead.

Meet our Clinical Teaching Fellows

We are a new cohort of Clinical Teaching Fellows, bringing together educators from medicine, emergency medicine, surgery, paediatrics and psychiatry. As a team, we are passionate about supporting and developing both undergraduate and postgraduate medical education, whilst continuing to explore innovative ways to enhance the learning experience. Over the coming year, we will be building on existing teaching programmes and embracing technology, high-fidelity simulation and gamification to create engaging, practical and interactive learning opportunities. We look forward to working with our students, trainees and colleagues throughout the year - please do come and say hello, share your ideas, or get in touch via Teaching.Fellows@uhcw.nhs.uk if there is anything we can do to support your learning and development!

Recognising our colleagues for their support and contribution towards

Education at UHCW

Acute Med Experience

You need to know this if you are rotating in Acute Medicine

I am **Dr. Elizabeth Moss (Liz Moss)**, Clinical Lead for Acute Medicine and it is important for me that you enjoy your shifts in our department. I am passionate about Acute Medicine as I believe our assessment and management of the patient can set them on the right track for the rest of their admission.

We are a friendly and supportive team who are used to working under pressure and with different colleagues everyday.

My top tips for making the most of your Acute shifts would be:-

- **Arrive on time and highlight your training requirements** and stage of training to the Consultant or Registrar at the start of the shift, as we may be able to allocate you to an area that's most suited to your training requirements e.g. IMTs to ED
- **Communicate your plans** for the patient with the nursing staff looking after them, it sounds obvious but you'd be surprised how often this doesn't happen.
- **Respond to escalations** from nurses – if the patient is unwell then assess them immediately or find someone who can.
- **Document everything** – if it isn't written in the notes then it hasn't happened.
- **Don't copy and paste**, if you are seeing a patient then summarise the history to that point.
- **Learn how to use EPR efficiently & in the right way** – training videos can be found in EOLAS App and MedEd website
- **VTE risk assessments and drug histories** are part of the medical clerking so please don't miss these, as patients will come to harm.
- **Be proactive and take ownership of the patients under your care** – making sure jobs are completed at the time they are planned, ensures the best care for our patients and better job satisfaction for us.
- **Be curious** - there is something to be learned from every patient that you see!
- **You will never be alone** so don't be afraid to ask questions, someone on shift will know the answer!

Finally, remember that patients are people and could be our loved ones, so keep them updated and if they are confused or unwell then please update their NOK.

We look forward to working with you!

Please feel free to reach out to me if you have any queries while you are on your shift

THE DOCTORS' MESS COMMITTEE

Applications Now Open!

Run by resident doctors, for resident doctors.

Every year, the Mess Committee is run entirely by resident doctors, for resident doctors. Whether you're a natural leader, a sports fanatic, a party planner, a champion for your colleagues, or the person everyone comes to for advice — **there is a committee role built for you.**

Executive

Provides strategic leadership, financial oversight, governance, and overall management of the Doctors' Mess.

Operations

Delivers the day-to-day functioning of the Mess, ensuring facilities, communications, wellbeing initiatives, sports, and social events are effectively organised.

Representation

Acts as the voice of key groups within the resident doctor workforce, gathering feedback, advocating for colleagues, and ensuring diverse perspectives are represented within the committee.

Development & Engagement

Creates opportunities for professional development, community engagement, sustainability initiatives, and activities that enrich the resident doctor experience beyond the workplace.

Too Tired to Drive?

If you suspect you are likely to need rest facilities after a night shift ahead of time, please email jayne.sanderson@uhcw.nhs.uk and MedicalEducation@uhcw.nhs.uk. Out of hours, please bleep the site manager on 4074. They will be able to provide you with a room to sleep and shower. Alternatively try using the Resident Doctors Mess space next to the 4th Floor Rotunda.
