

Novice Anaesthetists Course Feedback

Course Feedback (What our learners say)

- No matter what our role is we all have situations where we can't remember what to do. Seeing different scenarios were great and made us think about how we could help in those situations.
- Scenarios appropriate to level of learning. X10
- Equal clinical v human factors.
- I enjoyed the aspect of working with different anaesthetists and hearing their thought process throughout the simulation.
- I liked that we got to listen to the feedback at the end and ODP feedback was included.
- Signs and symptoms of common complications during post operative and operative procedure. X3
- Highlighted the need to work as a team, communicating well and assigning roles.
- Non-judgemental feedback and debrief. X19
- Safe environment to practice.
- More confident in anaesthetic emergencies.
